01 / Claim

What capability are we testing, under which conditions?

EX04 / BridgeData V2 | Source analysis | C1 | P: paper; W: project; R: repository

Diverse physical demonstrations support goal- and language-conditioned manipulation across selected environments.

1. System and capability

Name your system, tested capability and physical mechanism. Separate your proposed claim from published results.

A WidowX collection platform records demonstrations for several offline-learning approaches. [P Dataset; W]

2. Conditions and boundary

State task, configuration, conditions and exclusions. Use Project development for your own final project.

Selected skills, objects and environments; demonstrations define a finite collection scope. [P Dataset]

3. Measure and comparison

Define measure, units, trial unit, criterion and comparator before evaluation. Label proposed versus observed values.

Metrics: physical task success on seen/unseen tasks. The paper evaluates six imitation/offline-RL methods. [P Experiments]

4. Purpose and next test

Select one feasible pilot and check resources/access. State what outcome would challenge the claim; results may be pending.

Next test: vary skill diversity while keeping total demonstrations and the policy family fixed. [P Experiments]

Review: Could your system work as shown while your claim is still false? Write one such outcome.

Example response: More demonstrations can coexist with failure on an unseen skill.

Worksheet 1 / Claim – evidence and team review

EX04 / BridgeData V2 | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX04 Project: BridgeData V2 Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2308.12952v1	Paper: method/results; reported evidence, not our measurement.
W	bridgedata-v2.github.io	Project: system/videos; selected examples do not establish reliability.
R	github.com/rail-berkeley/bridge_data_v2	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

More demonstrations can coexist with failure on an unseen skill. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
