01 / Claim

What capability are we testing, under which conditions?

EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository

A learned family of gaits permits bounded behavior tuning for selected physical locomotion conditions.

1. System and capability

Name your system, tested capability and physical mechanism. Separate your proposed claim from published results.

A locomotion policy exposes gait parameters instead of requiring retraining for every behavior. [P; W]

2. Conditions and boundary

State task, configuration, conditions and exclusions. Use Project development for your own final project.

Simulated training and demonstrated Unitree Go1 deployment; arbitrary terrain capability is outside this example. [W; R]

3. Measure and comparison

Define measure, units, trial unit, criterion and comparator before evaluation. Label proposed versus observed values.

Outcomes include documented running and stair traversal. For a new comparison, measure completion and falls over equal attempts. [W]

4. Purpose and next test

Select one feasible pilot and check resources/access. State what outcome would challenge the claim; results may be pending.

Next test: compare two gait settings on the same terrain with identical speed commands and attempt counts. [W]

Review: Could your system work as shown while your claim is still false? Write one such outcome.

Example response: Many gaits can look impressive while one required traverse still fails.

Worksheet 1 / Claim – evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07 Project: Walk These Ways Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2212.03238	Paper: method/results; reported evidence, not our measurement.
W	gmargo11.github.io/walk-these-ways	Project: system/videos; selected examples do not establish reliability.
R	github.com/Improbable-AI/walk-these-ways	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

Many gaits can look impressive while one required traverse still fails. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
