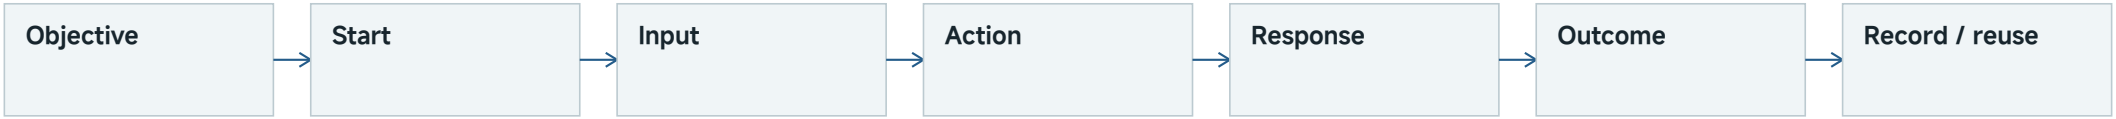
02 / Experience

What interaction data does one episode generate, and how will we use them?

EX06 / NeuralFeels | Source analysis | C1 | P: paper; W: project; R: repository



1. Objective and start

Link the claim, episode start/reset and end rule. Label this episode planned, team-observed or externally reported.

A hand rotates an object while synchronized sensing observes successive contacts and visible surfaces. [P 4.3]

2. Input and action

Identify observations, timestamps, commands and executed actions where known. Distinguish command from response.

RGB-D, tactile images and joint configuration provide complementary information about the same interaction. [P 4]

3. Response and outcome

Record response, outcome rule, failures, timeouts and interventions. A selected success does not establish reliability.

Pose/shape estimates are outputs, not ground truth. Occlusion and slipping can weaken the observations. [P 2]

4. Record and reuse

List the retained interaction data: observations, actions, responses, outcomes and context. State intended use and missing fields.

FeelSight records support perception evaluation; an exploration policy generates the interaction rather than demonstrating task success. [P 4.3; R]

Review: What could make the recorded outcome misleading? Mark missing measurements or an alternative explanation.

Example response: An estimated pose is not an independent outcome measurement.

Worksheet 2 / Experience - evidence and team review

EX06 / NeuralFeels | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX06 Project: NeuralFeels Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2312.13469v1	Paper: method/results; reported evidence, not our measurement.
W	suddhu.github.io/neural-feels	Project: system/videos; selected examples do not establish reliability.
R	github.com/facebookresearch/neuralfeels	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

An estimated pose is not an independent outcome measurement. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
