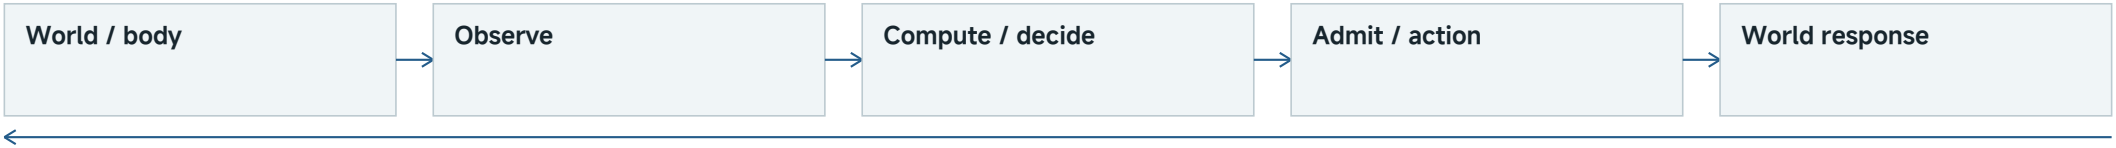
03 / System

What system produces that interaction?

EX01 / ALOHA / ACT | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

Leader/follower arms, grippers, four cameras and tabletop objects form the physical system. [P III]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

ACT maps images/joints to future joint targets; temporal ensembling combines overlapping predictions. [P IV]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

A human demonstrates and resets; autonomous evaluation uses the learned controller. Logging and visualization are documented. [P V; R]

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Next check: replay one recorded episode and verify camera/joint/action ordering; not executed for this example. [R]

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: Wrong joint ordering could defeat a correct policy; inspect the replay.

Worksheet 3 / System – evidence and team review

EX01 / ALOHA / ACT | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX01 Project: ALOHA / ACT Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2304.13705v1	Paper: method/results; reported evidence, not our measurement.
W	tonyzhaozh.github.io/aloha	Project: system/videos; selected examples do not establish reliability.
R	github.com/tonyzhaozh/act	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

Wrong joint ordering could defeat a correct policy; inspect the replay. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
