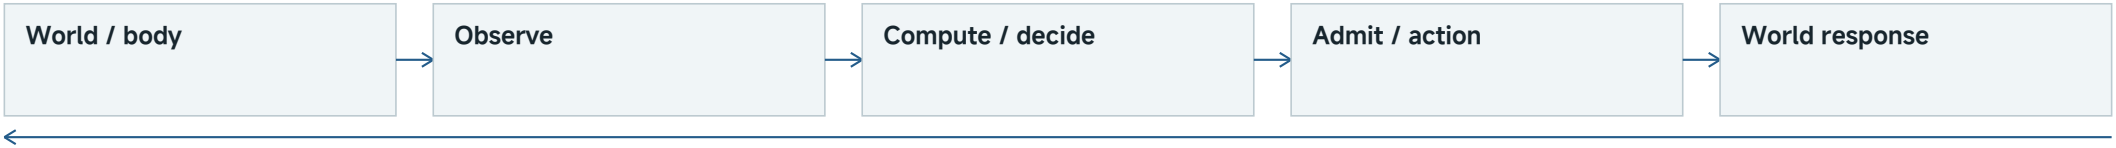
03 / System

What system produces that interaction?

EX05 / LEAP Hand | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

Sixteen actuated joints, finger linkages and an object create the physical manipulation system. [P; R]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

Joint-target commands pass through the hand API and actuator control; policies depend on the correct mapping. [R]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

The operator assembles, initializes, positions objects and supervises trials. Identify model and controller configuration. [W; R]

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Next check: command one small joint movement and verify motor order, sign and measured response. Not executed here. [R]

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: Wrong motor sign or ordering can mimic a poor policy.

Worksheet 3 / System – evidence and team review

EX05 / LEAP Hand | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX05 Project: LEAP Hand Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2309.06440	Paper: method/results; reported evidence, not our measurement.
W	v1.leaphand.com	Project: system/videos; selected examples do not establish reliability.
R	github.com/leap-hand/LEAP_Hand_API	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

Wrong motor sign or ordering can mimic a poor policy. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
