04 / Grounding

What connects the representation or interpretation to physical evidence?

EX04 / BridgeData V2 | Source analysis | C1 | P: paper; W: project; R: repository

Prediction / representation	Matched reference	Difference / ambiguity	Conclusion / scope limit

1. Comparison boundary

Name the prediction/measurement and reference. Match conditions; identify simulated versus physical evidence.

Compare policy execution with task outcome criteria in the tested environments. [P Experiments]

2. Quantities and validity

Declare quantity, units, frame, tolerance and measurement limits. Distinguish a chosen tolerance from observed uncertainty.

State goal/instruction, reset distribution and outcome rule; do not assume every trajectory includes depth. [P Dataset]

3. Results and uncertainty

Give paired outcomes, trial counts and uncertainty or limits. If untested, record the protocol and missing evidence explicitly.

Published seen/unseen task results support bounded transfer; aggregate data counts do not measure generalization alone. [P Experiments]

4. Interpretation and challenge

Bound the conclusion and consider another cause of the difference. Choose a diagnostic test or scope restriction.

A camera or action-format change may explain failure; isolate it before attributing failure to the learning method. [R]

Review: Could sensing error, reset differences or selection explain the discrepancy instead of model error?

Example response: Task/reset differences can imitate a model-generalization gap.

Worksheet 4 / Grounding – evidence and team review

EX04 / BridgeData V2 | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX04 Project: BridgeData V2 Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2308.12952v1	Paper: method/results; reported evidence, not our measurement.
W	bridgedata-v2.github.io	Project: system/videos; selected examples do not establish reliability.
R	github.com/rail-berkeley/bridge_data_v2	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

Task/reset differences can imitate a model-generalization gap. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
