# 04 / Grounding

What connects the representation or interpretation to physical evidence?

**EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository**

| Prediction / representation | Matched reference | Difference / ambiguity | Conclusion / scope limit |
|---|---|---|---|
| | | | |

## 1. Comparison boundary

Name the prediction/measurement and reference. Match conditions; identify simulated versus physical evidence.

Compare simulator-trained behavior with physical outcomes under declared terrain and command conditions. [W]

## 2. Quantities and validity

Declare quantity, units, frame, tolerance and measurement limits. Distinguish a chosen tolerance from observed uncertainty.

Distinguish desired speed/gait from achieved motion; the same network does not imply identical dynamics. [R]

## 3. Results and uncertainty

Give paired outcomes, trial counts and uncertainty or limits. If untested, record the protocol and missing evidence explicitly.

Physical demonstrations show selected behaviors; no complete hardware trial-log audit was performed for this example. [W]

## 4. Interpretation and challenge

Bound the conclusion and consider another cause of the difference. Choose a diagnostic test or scope restriction.

Domain randomization reduces selected mismatches but does not validate every contact, disturbance or terrain. [R]

Review: Could sensing error, reset differences or selection explain the discrepancy instead of model error?

Example response: Contact mismatch and different resets can both change performance.

# Worksheet 4 / Grounding - evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07  Project: Walk These Ways  Claim ID: C1  Revision: draft 1

Mode: Source analysis  Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

| Evidence ID | Artifact/source + location (clickable) | What it supports; limitation / access gap |
|---|---|---|
| **P** | arxiv.org/abs/2212.03238 | Paper: method/results; reported evidence, not our measurement. |
| **W** | gmargo11.github.io/walk-these-ways | Project: system/videos; selected examples do not establish reliability. |
| **R** | github.com/Improbable-AI/walk-these-ways | Repository: documented route; code and data not executed or audited. |

**Next action / owner / verification:**

Contact mismatch and different resets can both change performance. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
