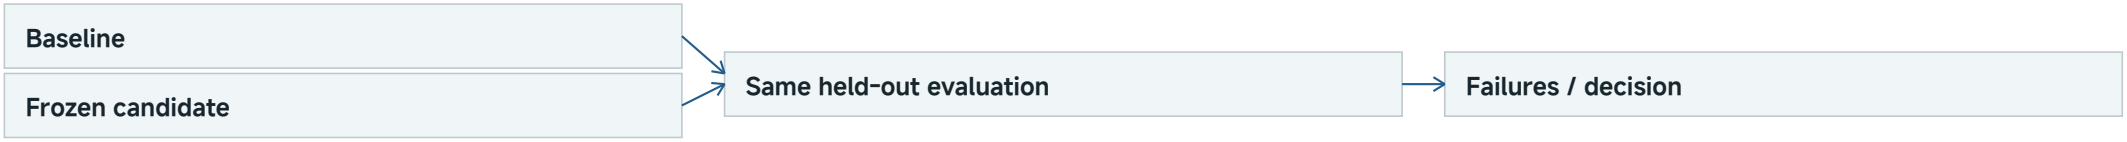
05 / Learning

How is experience used, and what contribution is supported?

EX01 / ALOHA / ACT | Source analysis | C1 | P: paper; W: project; R: repository



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

Physical demonstrations provide supervised action sequences; policy deployment is inference, not online weight updating. [P IV]

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Keep demonstrations distinct from evaluation attempts; task-specific training does not prove generalization to arbitrary objects. [P V]

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

Reported ACT gains and chunking/ensembling ablations support the method on selected tasks; difficult tasks still fail. [P V-VI]

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Support selected fine tasks; candy and bag-opening failures limit broader dexterity claims. [P App F]

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: The task, demonstrations and reset protocol must match across methods.

Worksheet 5 / Learning - evidence and team review

EX01 / ALOHA / ACT | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX01 Project: ALOHA / ACT Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2304.13705v1	Paper: method/results; reported evidence, not our measurement.
W	tonyzhaozh.github.io/aloha	Project: system/videos; selected examples do not establish reliability.
R	github.com/tonyzhaozh/act	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

The task, demonstrations and reset protocol must match across methods. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
