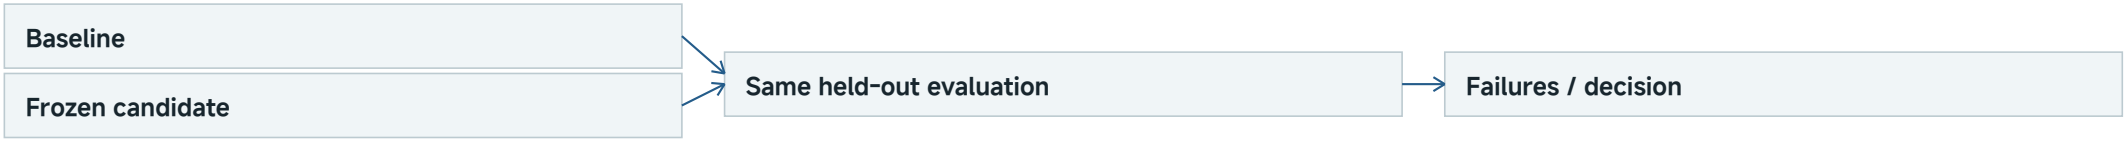
# 05 / Learning

How is experience used, and what contribution is supported?

**EX03 / DROID | Source analysis | C1 | P: paper; W: project; R: repository**



## 1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

DROID supplies demonstrations for co-training existing policy methods; it is not a new learning algorithm. [P V]

## 2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Track source/task/scene partitions and co-training mixtures; near-duplicate contexts can weaken a generalization claim. [P IV-V]

## 3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

The reported comparison favors DROID co-training on the selected tasks; it does not isolate every diversity factor. [P V]

## 4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Support usefulness on tested tasks; collection diversity and demonstration quality remain separate explanations. [P V]

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: Fix the downstream method and budget before attributing improvement to diversity.

# Worksheet 5 / Learning - evidence and team review

EX03 / DROID | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX03  Project: DROID  Claim ID: C1  Revision: draft 1

Mode: Source analysis  Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

| Evidence ID | Artifact/source + location (clickable) | What it supports; limitation / access gap |
|---|---|---|
| **P** | arxiv.org/abs/2403.12945v1 | Paper: method/results; reported evidence, not our measurement. |
| **W** | droid-dataset.github.io | Project: system/videos; selected examples do not establish reliability. |
| **R** | github.com/droid-dataset/droid | Repository: documented route; code and data not executed or audited. |

**Next action / owner / verification:**

Fix the downstream method and budget before attributing improvement to diversity. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
