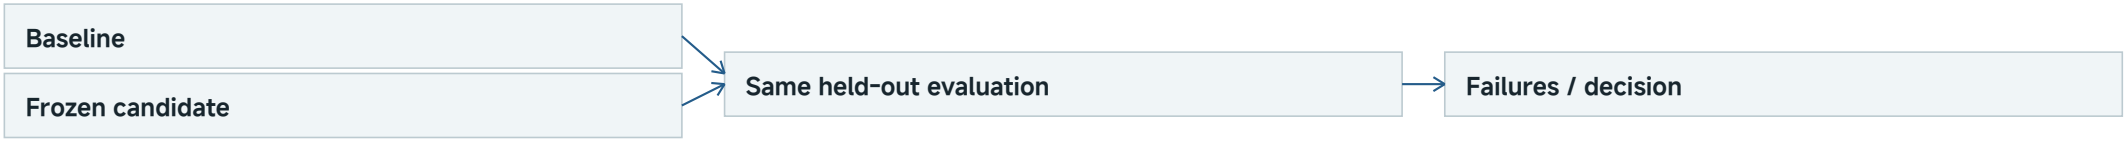
05 / Learning

How is experience used, and what contribution is supported?

EX05 / LEAP Hand | Source analysis | C1 | P: paper; W: project; R: repository



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

The platform supports teleoperation and learned controllers; hand manufacture itself is not a learning algorithm. [P]

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Separate simulation training, imported video/teleoperation data and physical evaluation evidence. [P; W]

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

Reported tests favor LEAP over Allegro within their protocols; hardware comparisons do not establish every learned-policy claim. [P]

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Support the realized research platform and bounded tasks; broad quantitative physical rotation reliability needs stronger evidence. [P]

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: Use the same object, reset and outcome accounting across controllers.

Worksheet 5 / Learning - evidence and team review

EX05 / LEAP Hand | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX05 Project: LEAP Hand Claim ID: C1 Revision: draft 1

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: paper sections and public documentation; no dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/abs/2309.06440	Paper: method/results; reported evidence, not our measurement.
W	v1.leaphand.com	Project: system/videos; selected examples do not establish reliability.
R	github.com/leap-hand/LEAP_Hand_API	Repository: documented route; code and data not executed or audited.

Next action / owner / verification:

Use the same object, reset and outcome accounting across controllers. Reviewer: inspect the cited basis before adapting this answer.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
