a Declared experiment

Policy

Identified exported model

Observations

Original noise (level 1.0)

Trials

Seeds 20000–20099

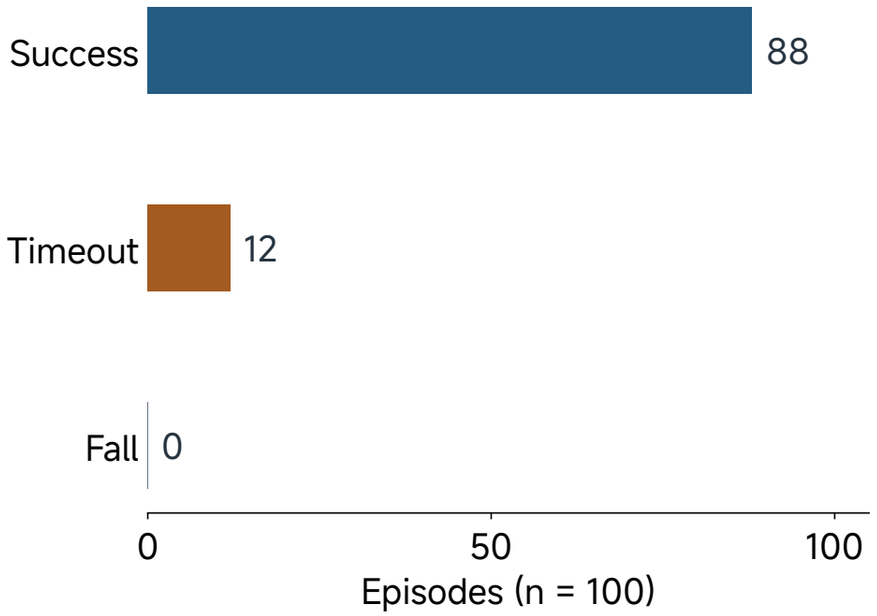
Success

First target; error < 0.1 rad

Limit

1000 actions; 50 simulated s

b Retained outcomes



88 / 100 = 88%

All timeouts retained in denominator

c Supported scope

First-goal simulation

88 / 100 under this protocol

Continuous replay

Different protocol / event counter

Training and hardware

Not established by this record

Changing noise, horizon or success rule changes the experiment.

Saved simulation evidence; this figure does not execute an evaluation.
