01 / Claim

What capability are we testing, under which conditions?

EX03 / DROID | Source analysis | C1 | P: paper; W: project; R: repository

DROID co-training improves reported diffusion-policy success on six tested tasks; collection scale is not universal coverage.

1. System and capability

Name your system, tested capability and physical mechanism. Separate your proposed claim from published results.

A standardized Franka/camera/VR platform collects demonstrations; a diffusion policy uses them for downstream tasks. Focus: co-training benefit. [P III,V]

2. Conditions and boundary

State task, configuration, conditions and exclusions. Use Project development for your own final project.

Six tasks in four locations, each with in-distribution and shifted variants. Named pilot: Closing Waffle Maker, with added distractors for OOD. [P V; App E]

3. Measure and comparison

Define measure, units, trial unit, criterion and comparator before evaluation. Label proposed versus observed values.

Measure task success: 10 rollouts/task-setting/method. Compare no co-training, OXE co-training and DROID co-training, not dataset sizes alone. [P V]

4. Purpose and next test

Select one feasible pilot and check resources/access. State what outcome would challenge the claim; results may be pending.

Offline pilot: extract one Waffle Maker comparison with reset distribution and label rule. Pass: all methods, conditions and trial counts linked to one result. [P App E]

Review: Could your system work as shown while your claim is still false? Write one such outcome.

Example response: A larger dataset alone does not demonstrate a downstream improvement; inspect the same-method comparison.

Worksheet 1 / Claim – evidence and team review

EX03 / DROID | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX03 Project: DROID Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2403.12945v1	Paper: method/results; reported evidence, not our measurement.
W	droid-dataset.github.io	Project: system/videos; selected examples do not establish reliability.
R	github.com/droid-dataset/droid	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: extract one Waffle Maker ID/OOD comparison; verify reset, method and 10-rollout denominators.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____
