01 / Claim

What capability are we testing, under which conditions?

EX08 / DayDreamer | Source analysis | C1 | P: paper; W: project; R: repository

In the reported A1 training run, Dreamer learns physical walking within about one hour; SAC does not reach walking in the shown comparison.

1. System and capability

Name your system, tested capability and physical mechanism. Separate your proposed claim from published results.

Unitree A1 learns rolling, standing and walking through physical interaction; world-model learning supports actor-critic improvement in imagination. [P 3.1]

2. Conditions and boundary

State task, configuration, conditions and exclusions. Use Project development for your own final project.

Start on the back; no simulator or episode resets. Human boundary interventions are disclosed. Analyze the shown training run, not a repeated-run guarantee. [P 3.1; Fig 2]

3. Measure and comparison

Define measure, units, trial unit, criterion and comparator before evaluation. Label proposed versus observed values.

Compare Dreamer/SAC learning curves versus physical training time; Dreamer walks near 1 h, SAC only rolls. The curve is one run; shaded spread is within time bins. [P Fig 2]

4. Purpose and next test

Select one feasible pilot and check resources/access. State what outcome would challenge the claim; results may be pending.

Offline pilot: trace one real transition and the plotted training clock/intervention record. Pass: real versus imagined origins and human assistance are identifiable.

Review: Could your system work as shown while your claim is still false? Write one such outcome.

Example response: Convincing predicted images do not establish physical walking; inspect the robot curve and shown behavior.

Worksheet 1 / Claim – evidence and team review

EX08 / DayDreamer | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX08 Project: DayDreamer Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2206.14176v1	Paper: method/results; reported evidence, not our measurement.
W	danijar.com/project/daydreamer	Project: system/videos; selected examples do not establish reliability.
R	github.com/danijar/daydreamer	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: inspect Fig 2 and 3.1; verify the one-run clock, SAC comparison and assistance before quoting the one-hour result.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
