# 01 / Claim

What capability are we testing, under which conditions?

**EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository**

Tunable MoB gaits support selected physical behaviors; the quantitative platform-terrain comparison here is simulated, not hardware reliability.

## 1. System and capability

Name your system, tested capability and physical mechanism. Separate your proposed claim from published results.

Go1 uses a command-conditioned learned gait policy. Focus: how choosing a gait changes a bounded terrain outcome, not online weight retraining. [P 4.2]

## 2. Conditions and boundary

State task, configuration, conditions and exclusions. Use Project development for your own final project.

Quantitative case: simulated platforms up to 16 cm, maximum episode 10 s. Physical clips are separate qualitative deployment evidence. [P Table 3; App C]

## 3. Measure and comparison

Define measure, units, trial unit, criterion and comparator before evaluation. Label proposed versus observed values.

Simulated survival fraction: trot 0.88 versus gait-free 0.83; reported standard deviations 0.01 across three training seeds. This is duration, not success probability. [P Table 3]

## 4. Purpose and next test

Select one feasible pilot and check resources/access. State what outcome would challenge the claim; results may be pending.

Offline pilot: compare Table 3 trot and gait-free rows, then identify a physical clip without inferring its failure rate. Pass: origin, metric and denominator retained.

Review: Could your system work as shown while your claim is still false? Write one such outcome.

Example response: A simulated duration gain does not establish a lower physical fall rate.

# Worksheet 1 / Claim – evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07  Project: Walk These Ways  Claim ID: C1  Revision: draft 2

Mode: Source analysis  Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

| Evidence ID | Artifact/source + location (clickable) | What it supports; limitation / access gap |
|---|---|---|
| **P** | arxiv.org/html/2212.03238v1 | Paper: method/results; reported evidence, not our measurement. |
| **W** | gmargo11.github.io/walk-these-ways | Project: system/videos; selected examples do not establish reliability. |
| **R** | github.com/Improbable-AI/walk-these-ways | Repository: linked route; code, raw data and current commit not audited. |

**Next action / owner / verification:**

Analyst: extract Table 3 trot/gait-free survival and three-seed scope; label the platform test simulation.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
