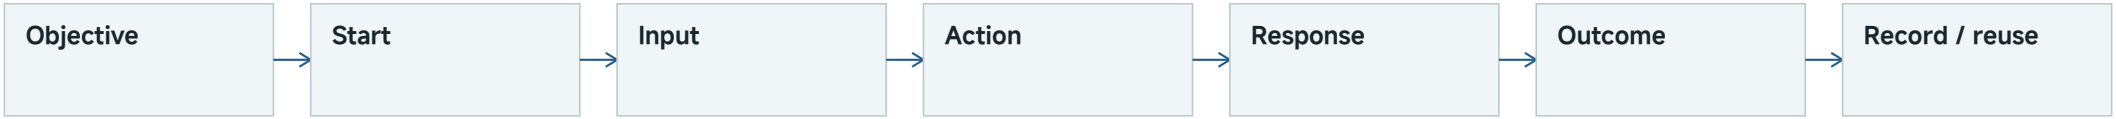
02 / Experience

What interaction data does one episode generate, and how will we use them?

EX08 / DayDreamer | Source analysis | C1 | P: paper; W: project; R: repository



1. Objective and start

Link the claim, episode start/reset and end rule. Label this episode planned, team-observed or externally reported.

Continuous training starts supine; rolling, standing and walking emerge without episodic resets. The study observes behavior over time, not a fixed pick-place episode. [P 3.1]

2. Input and action

Identify observations, timestamps, commands and executed actions where known. Distinguish command from response.

At 20 Hz, motor-angle requests drive hardware PD control. Inputs include motor angles, orientation and angular velocity; replay retains observations/actions/rewards. [P 3.1; R]

3. Response and outcome

Record response, outcome rule, failures, timeouts and interventions. A selected success does not establish reliability.

Falls are marked in Fig 2; a human intervenes at training-area boundaries. Recovery is behavior, not an automatic reset; record assistance and training-clock pauses. [P 3.1]

4. Record and reuse

List the retained interaction data: observations, actions, responses, outcomes and context. State intended use and missing fields.

Physical replay trains the world model; imagined trajectories train behavior. Record origin, robot/configuration, time, reward and intervention; imagination does not add physical trial count. [P Method]

Review: What could make the recorded outcome misleading? Mark missing measurements or an alternative explanation.

Example response: Recovery without resets and boundary assistance must both be disclosed; imagination is not a second physical trial.

Worksheet 2 / Experience - evidence and team review

EX08 / DayDreamer | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX08 Project: DayDreamer Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2206.14176v1	Paper: method/results; reported evidence, not our measurement.
W	danijar.com/project/daydreamer	Project: system/videos; selected examples do not establish reliability.
R	github.com/danijar/daydreamer	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: trace one physical replay sample and a fall/intervention marker; distinguish a recovery from an episode reset.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____
