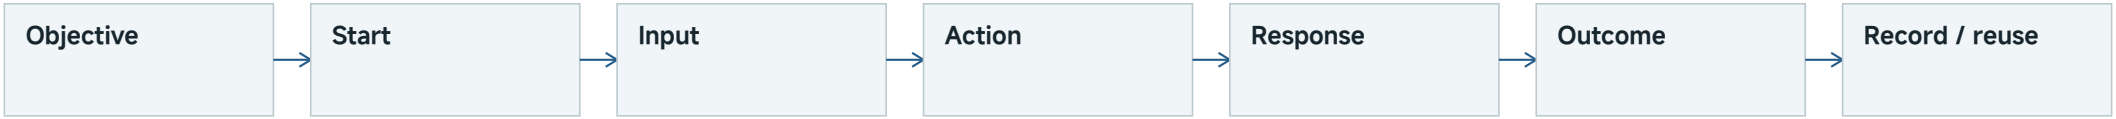
# 02 / Experience

What interaction data does one episode generate, and how will we use them?

**EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository**



## 1. Objective and start

Link the claim, episode start/reset and end rule. Label this episode planned, team-observed or externally reported.

Reconstructed simulated episode: fixed command, platform-terrain rollout; end at termination or 10 s. Physical traverse/reset records were not audited. [P 4.2]

## 2. Input and action

Identify observations, timestamps, commands and executed actions where known. Distinguish command from response.

Proprioception and gait/speed commands produce joint targets; achieved motion/contact differ from requested motion. Exact raw feature order/timestamps remain NE. [R]

## 3. Response and outcome

Record response, outcome rule, failures, timeouts and interventions. A selected success does not establish reliability.

Record episode length, falls and command choice; count operator tuning separately in physical examples. Survival fraction is not a binary traverse-success label. [P Table 3; App C]

## 4. Record and reuse

List the retained interaction data: observations, actions, responses, outcomes and context. State intended use and missing fields.

Simulation transitions train the policy; three training seeds support the table statistics. Hardware footage does not supply a physical trial denominator. [P Table 3; W]

Review: What could make the recorded outcome misleading? Mark missing measurements or an alternative explanation.

Example response: Operator tuning and selected starts can change physical clips; preserve episode/command provenance.

# Worksheet 2 / Experience - evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07  Project: Walk These Ways  Claim ID: C1  Revision: draft 2

Mode: Source analysis  Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

| Evidence ID | Artifact/source + location (clickable) | What it supports; limitation / access gap |
|---|---|---|
| **P** | arxiv.org/html/2212.03238v1 | Paper: method/results; reported evidence, not our measurement. |
| **W** | gmargo11.github.io/walk-these-ways | Project: system/videos; selected examples do not establish reliability. |
| **R** | github.com/Improbable-AI/walk-these-ways | Repository: linked route; code, raw data and current commit not audited. |

**Next action / owner / verification:**

Analyst: verify episode termination and 10 s horizon; do not count video clips as physical trial logs.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
