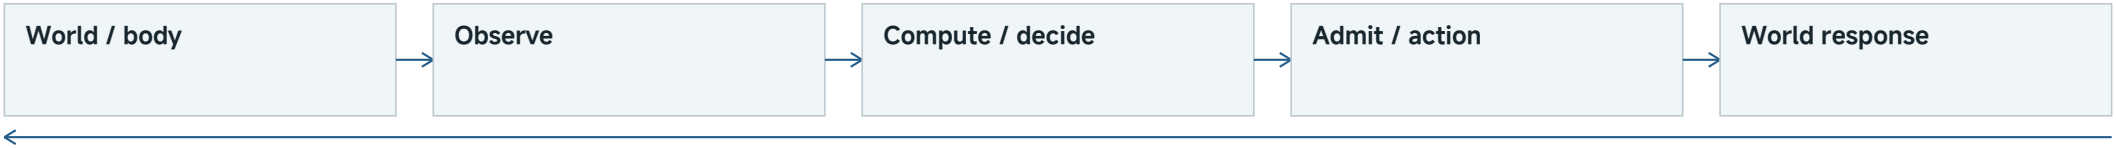
03 / System

What system produces that interaction?

EX01 / ALOHA / ACT | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

Two arm pairs, grippers, four cameras and cup; distinguish camera views, named follower joints and target channels. Raw episode inspected here: none. [P III]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

ACT produces future joint targets with temporal ensembling. Proposed audit units: joint angle rad, time s; verify gripper scale/order against R before conversion. [P IV; R]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

Human demonstrates/resets; learned policy runs evaluation. Exact stop, joint limits and configuration hash remain NE; no powered replay is authorized by this example. [P V; R]

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Proposed offline check: one episode has matching frame/action indices, monotonic timestamps and named joint order. Any unexplained missing/misordered channel fails the check. Analyst owns it.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: A missing joint-order or timestamp convention blocks replay interpretation; reject rather than guess.

Worksheet 3 / System – evidence and team review

EX01 / ALOHA / ACT | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX01 Project: ALOHA / ACT Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2304.13705v1	Paper: method/results; reported evidence, not our measurement.
W	tonyzhaozh.github.io/aloha	Project: system/videos; selected examples do not establish reliability.
R	github.com/tonyzhaozh/act	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: audit named joints, units and timestamp order offline; pass only with no unexplained channel mismatch.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____
