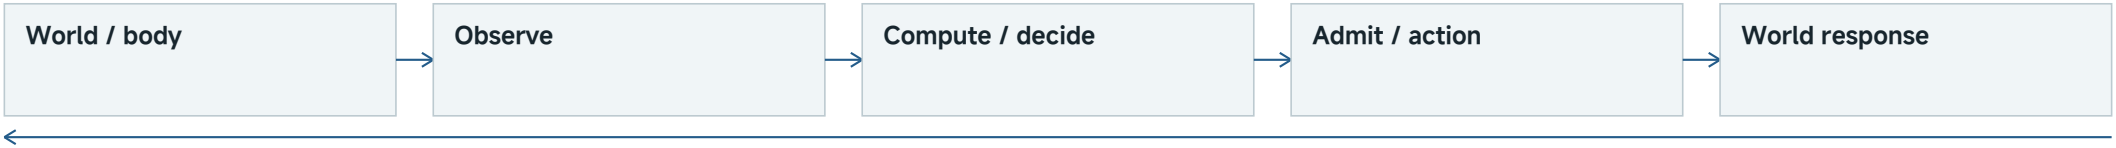
03 / System

What system produces that interaction?

EX04 / BridgeData V2 | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

WidowX, gripper, camera and teleoperation apparatus produce records; GCBC consumes a selected processed subset and goal image. [P Dataset; R]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

Policy actions pass through a robot controller. Proposed audit: position m, rotation rad, gripper scale explicitly declared; actual encoding/order/rate must be checked in the selected loader. [R]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

Human resets and supervises; separate recording, conversion and deployment versions. Hardware stop/limits and exact source commit remain NE; this example authorizes offline inspection only.

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Proposed offline pass: one raw/processed episode preserves frame/action correspondence, units, scaling and channel availability. Missing depth must be explicit, never silently synthesized. Analyst checks.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: An undocumented action scale or missing channel blocks interpretation of the converted episode.

Worksheet 3 / System - evidence and team review

EX04 / BridgeData V2 | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX04 Project: BridgeData V2 Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2308.12952v1	Paper: method/results; reported evidence, not our measurement.
W	bridgedata-v2.github.io	Project: system/videos; selected examples do not establish reliability.
R	github.com/rail-berkeley/bridge_data_v2	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: verify conversion correspondence, action units and scaling offline; fail undocumented channel/scaling changes.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____
