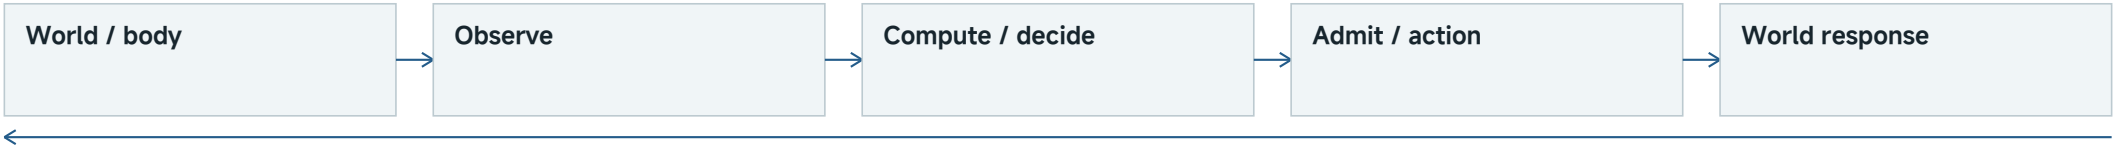
03 / System

What system produces that interaction?

EX08 / DayDreamer | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

A1 has 12 motors and proprioceptive sensing; asynchronous actor/learner exchange records and updated parameters. This case excludes the separate arm/navigation robots. [P 3.1; Method]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

Motor-angle commands execute at 20 Hz through hardware PD; Butterworth filtering removes high-frequency commands. Audit rad, rad/s and timestamp s; verify native encoding in R. [P 3.1]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

Human handles space boundaries; wear/repair can interrupt operation. Exact PD gains, hard limits and stop configuration are NE here; no local powered test is implied. [P 3.1; Limitations]

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Offline pass: a physical replay sample links observation, requested angle, reward and policy version; imagined samples carry a different origin. Reject ambiguous origin/time metadata. Analyst checks.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: Replay origin, clock and policy identity are necessary before analyzing asynchronous learning.

Worksheet 3 / System – evidence and team review

EX08 / DayDreamer | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX08 Project: DayDreamer Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2206.14176v1	Paper: method/results; reported evidence, not our measurement.
W	danijar.com/project/daydreamer	Project: system/videos; selected examples do not establish reliability.
R	github.com/danijar/daydreamer	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: verify replay time, 20 Hz command meaning and policy version offline; reject ambiguous real/imagined provenance.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
