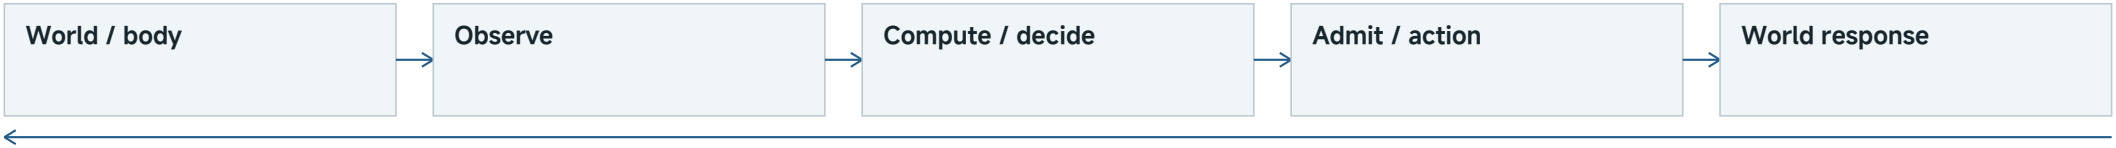
03 / System

What system produces that interaction?

EX05 / LEAP Hand | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

LEAP v1 has 16 actuated joints and an object/contact interface; the chosen case adds the VideoDex perception/policy route. [P Design; VI-C]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

Named joint targets reach the actuator API. Proposed audit contract: 16 angles in rad, explicit motor permutation/offset and timestamps in s; native mapping is not verified here. [R]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

Operator initializes, places objects and supervises; exact limits/stop and controller version remain NE. No motor command should be sent from an unverified mapping. [W; R]

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Offline pass: one mapped demonstration preserves all 16 joint names, order, sign and units; compare a chosen joint before/after mapping. Any unexplained offset fails. Analyst owns check.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: Wrong motor order/sign can defeat a correct policy; an unclear offset blocks replay.

Worksheet 3 / System – evidence and team review

EX05 / LEAP Hand | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX05 Project: LEAP Hand Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2309.06440v1	Paper: method/results; reported evidence, not our measurement.
W	v1.leaphand.com	Project: system/videos; selected examples do not establish reliability.
R	github.com/leap-hand/LEAP_Hand_API	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: audit 16-joint permutation, sign, offset and units offline; fail any unexplained mapping difference.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
