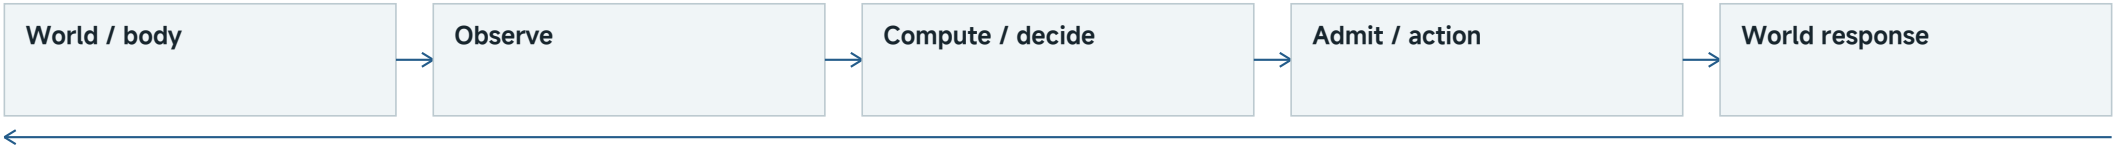
03 / System

What system produces that interaction?

EX06 / NeuralFeels | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

Allegro on Franka, DIGIT fingertips and primary RGB-D; extra cameras construct the physical reference. Simulator supplies its own object ground truth. [P Fig 7]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

Depth frontend feeds neural-field/pose optimization; existing policy generates contact. Audit units: depth/pose distance mm or m explicitly converted, joint angles rad; transforms carry named frames.

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

Calibrations link camera, hand base and fingertips. Human assistance/rapid jumps are acknowledged; exact stop/limit settings and raw calibration values remain NE. [P 3;4.2]

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Offline pass: one sequence has matching timestamps, explicit camera-to-hand/tactile frames and consistent distance units; a known static pose must not move under frame conversion. Analyst checks.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: Wrong transforms, timestamps or distance units can mimic poor estimation; check conversion before inference.

Worksheet 3 / System – evidence and team review

EX06 / NeuralFeels | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX06 Project: NeuralFeels Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2312.13469v1	Paper: method/results; reported evidence, not our measurement.
W	suddhu.github.io/neural-feels	Project: system/videos; selected examples do not establish reliability.
R	github.com/facebookresearch/neuralfeels	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: verify camera/hand/tactile transforms and distance units offline; reject an inconsistent static-pose conversion.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
