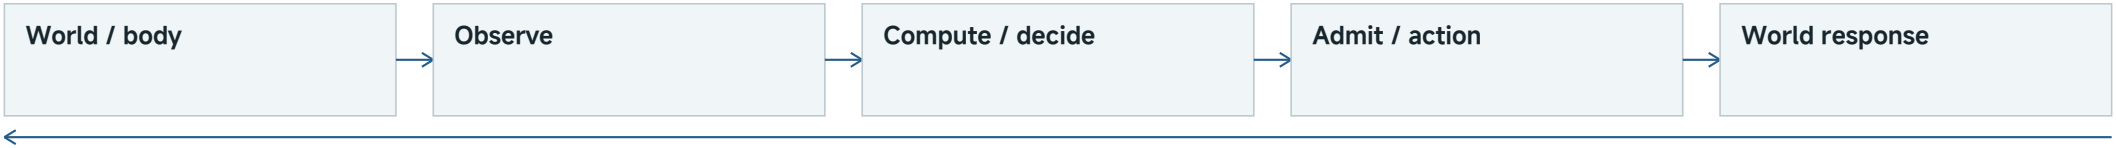
03 / System

What system produces that interaction?

EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

Go1, onboard sensing, low-level actuators and terrain form deployment; Isaac Gym training/evaluation and physical operation are distinct configurations. [P; R]

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

Audit speed in m/s, gait frequency Hz and joint targets rad, with explicit order/scales; map native encodings before replay. Exact runtime rate/limits remain NE. [R]

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

Human pilot selects behavior and supervises; stop/recovery settings and configuration/checkpoint hashes were not verified. Do not send commands from unverified observation scaling.

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Offline pass: named observation/action dimensions, scales and checkpoint agree with deployment config. Zero unexplained order/unit mismatches; missing limit/stop evidence blocks physical use. Analyst checks.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Example response: Wrong input scaling can mimic Sim2Real failure; verify the checkpoint interface before judging a policy.

Worksheet 3 / System – evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07 Project: Walk These Ways Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2212.03238v1	Paper: method/results; reported evidence, not our measurement.
W	gmargo11.github.io/walk-these-ways	Project: system/videos; selected examples do not establish reliability.
R	github.com/Improbable-AI/walk-these-ways	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: check observation/action order, units and config offline; fail any unexplained scale mismatch.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____
