04 / Grounding

What connects the representation or interpretation to physical evidence?

EX01 / ALOHA / ACT | Source analysis | C1 | P: paper; W: project; R: repository

Prediction / representation	Matched reference	Difference / ambiguity	Conclusion / scope limit

1. Comparison boundary

Name the prediction/measurement and reference. Match conditions; identify simulated versus physical evidence.

Compare ACT and BeT on the physical Open Cup final stage; keep the separate MuJoCo tasks outside this result. [P Tables I–II]

2. Quantities and validity

Declare quantity, units, frame, tolerance and measurement limits. Distinguish a chosen tolerance from observed uncertainty.

Success is lid opening, not requested angle or contact force. Keep the reported reset range; extract a repeatable lid-open judging rule before reuse. [P V; Fig 5]

3. Results and uncertainty

Give paired outcomes, trial counts and uncertainty or limits. If untested, record the protocol and missing evidence explicitly.

Table II: ACT 84%, BeT 0%; real protocol: 25 attempts/method, one seed. This small evaluation is not a multi-seed reliability estimate. [P VI]

4. Interpretation and challenge

Bound the conclusion and consider another cause of the difference. Choose a diagnostic test or scope restriction.

Perception and reset variation can alter success. Challenge: compare stage failures under matched starts; chunking is one explanation, not a measured motor property. [P VI; App F]

Review: Could sensing error, reset differences or selection explain the discrepancy instead of model error?

Example response: The one-seed result supports this reported task; differing resets or perception errors could change the comparison.

Worksheet 4 / Grounding – evidence and team review

EX01 / ALOHA / ACT | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX01 Project: ALOHA / ACT Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2304.13705v1	Paper: method/results; reported evidence, not our measurement.
W	tonyzhaozh.github.io/aloha	Project: system/videos; selected examples do not establish reliability.
R	github.com/tonyzhaozh/act	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: transcribe task, rates, reset range and trial protocol into one comparison row; check against P V–VI.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
