04 / Grounding

What connects the representation or interpretation to physical evidence?

EX04 / BridgeData V2 | Source analysis | C1 | P: paper; W: project; R: repository

Prediction / representation	Matched reference	Difference / ambiguity	Conclusion / scope limit

1. Comparison boundary

Name the prediction/measurement and reference. Match conditions; identify simulated versus physical evidence.

Compare GCBC on the same unseen marker task after 3- versus 13-skill training; do not substitute an unrelated seen/unseen method comparison. [P Table 6]

2. Quantities and validity

Declare quantity, units, frame, tolerance and measurement limits. Distinguish a chosen tolerance from observed uncertainty.

Measure physical task success per attempt. Approximately matched data sizes do not mean identical demonstrations; preserve skill membership and reset conditions. [P Table 6]

3. Results and uncertainty

Give paired outcomes, trial counts and uncertainty or limits. If untested, record the protocol and missing evidence explicitly.

Table 6 reports 0.30 versus 0.65 over 20 trials/policy: equivalently 6/20 versus 13/20, calculated from the reported rates. Multi-seed uncertainty is not extracted.

4. Interpretation and challenge

Bound the conclusion and consider another cause of the difference. Choose a diagnostic test or scope restriction.

The comparison supports transfer between these skill sets. Quality/content differences may remain; a camera or action-format change would confound a reproduction. [P Table 6; R]

Review: Could sensing error, reset differences or selection explain the discrepancy instead of model error?

Example response: The 35-point difference is task-specific; data content as well as skill count may differ.

Worksheet 4 / Grounding – evidence and team review

EX04 / BridgeData V2 | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX04 Project: BridgeData V2 Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2308.12952v1	Paper: method/results; reported evidence, not our measurement.
W	bridgedata-v2.github.io	Project: system/videos; selected examples do not establish reliability.
R	github.com/rail-berkeley/bridge_data_v2	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: check 0.30/0.65 and 20 trials; label 6/20 and 13/20 as calculated, not a new experiment.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
