04 / Grounding

What connects the representation or interpretation to physical evidence?

EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository

Prediction / representation	Matched reference	Difference / ambiguity	Conclusion / scope limit

1. Comparison boundary

Name the prediction/measurement and reference. Match conditions; identify simulated versus physical evidence.

Use Table 3 platform-terrain simulation as quantitative evidence. Physical stairs/curb clips illustrate capability but are not a matched trial series. [P 4.2; App C]

2. Quantities and validity

Declare quantity, units, frame, tolerance and measurement limits. Distinguish a chosen tolerance from observed uncertainty.

Metric is survival time / 10 s. Trotting 0.88 means mean survival 8.8 s, calculated; it does not mean 88% of hardware attempts succeeded. [P Table 3]

3. Results and uncertainty

Give paired outcomes, trial counts and uncertainty or limits. If untested, record the protocol and missing evidence explicitly.

Trot 0.88 +/- 0.01 versus gait-free 0.83 +/- 0.01: three seeds, simulated platforms. Physical run counts and disturbance distributions remain NE here. [P Table 3]

4. Interpretation and challenge

Bound the conclusion and consider another cause of the difference. Choose a diagnostic test or scope restriction.

Separate training-terrain reward from unseen-platform survival. Contact models and human gait selection limit physical extrapolation; a favorable clip cannot validate all terrains. [P Table 4; App C]

Review: Could sensing error, reset differences or selection explain the discrepancy instead of model error?

Example response: Survival fraction is a time statistic, not hardware success probability.

Worksheet 4 / Grounding – evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07 Project: Walk These Ways Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2212.03238v1	Paper: method/results; reported evidence, not our measurement.
W	gmargo11.github.io/walk-these-ways	Project: system/videos; selected examples do not establish reliability.
R	github.com/Improbable-AI/walk-these-ways	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: verify 0.88/0.83 are survival fractions; keep calculated 8.8/8.3 s distinct from success rates.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
