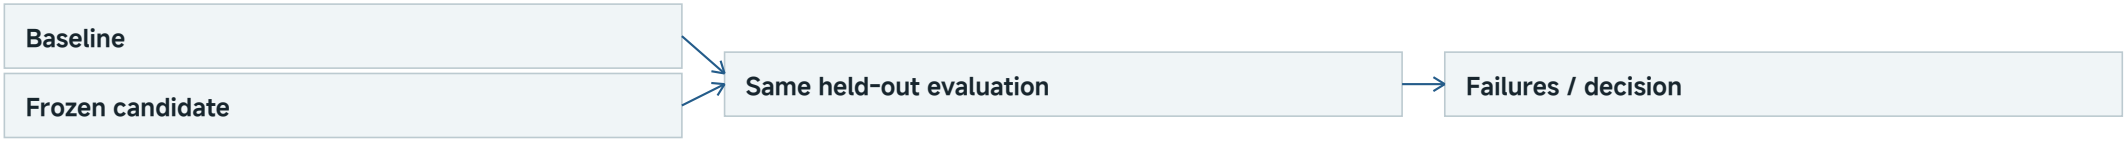
05 / Learning

How is experience used, and what contribution is supported?

EX04 / BridgeData V2 | Source analysis | C1 | P: paper; W: project; R: repository



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

GCBC learns actions conditioned on image goals from demonstrations. This worksheet analyzes the skill-diversity experiment, not the separate language-conditioned policies. [P Table 6]

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Keep 3/13-skill training populations separate from unseen marker-to-bowl testing. Pin conversion/subset versions; near-duplicate episode leakage must be checked before local training. [P; R]

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

Approximately size-matched GCBC: 30% success with 3 skills, 65% with 13; 20 trials/policy. Hold the learner fixed before interpreting diversity. [P Table 6]

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Retain a benefit for this selected transfer task. No conclusion follows about arbitrary skills, all languages or every offline learner. Analyst checks skill composition before reusing the result.

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: Table 6 holds GCBC and approximate size fixed; it does not prove all-language or arbitrary-task competence.

Worksheet 5 / Learning - evidence and team review

EX04 / BridgeData V2 | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX04 Project: BridgeData V2 Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2308.12952v1	Paper: method/results; reported evidence, not our measurement.
W	bridgedata-v2.github.io	Project: system/videos; selected examples do not establish reliability.
R	github.com/rail-berkeley/bridge_data_v2	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: verify 3/13-skill membership and held-out task; record any conversion or duplicate-episode uncertainty.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
