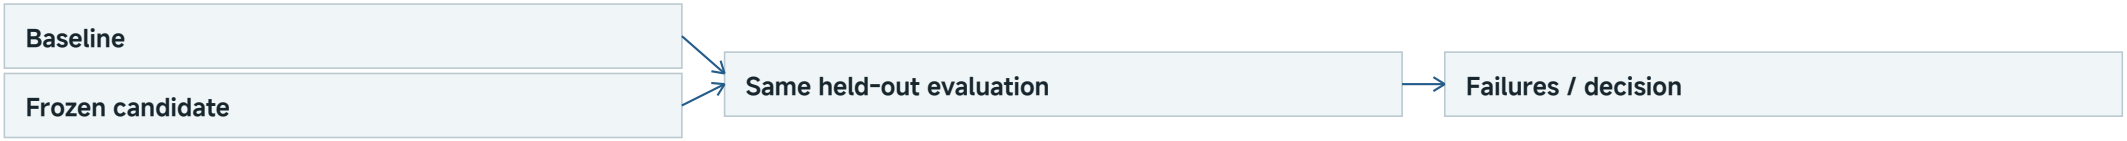
05 / Learning

How is experience used, and what contribution is supported?

EX08 / DayDreamer | Source analysis | C1 | P: paper; W: project; R: repository



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

Real transitions fit the world model; imagined rollouts update actor/critic. This is online learning, unlike merely changing gait commands in a fixed policy. [P Method]

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Online data and evaluation share the evolving learning system; do not invent an independent held-out dataset. Preserve policy/time identity and separate training behavior from a frozen-policy test.

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

Fig 2 compares Dreamer and SAC on A1; walking near 1 h is source-reported. One training run and within-bin shading cannot establish across-seed sample efficiency. [P 3.1]

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Retain feasibility of online physical learning in the shown run. Analyst proposes repeated starts with fixed budget and assistance accounting; this is a future test, not a negative result.

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: Account for intervention and repair costs; neither online experience nor imagination creates a held-out test automatically.

Worksheet 5 / Learning - evidence and team review

EX08 / DayDreamer | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX08 Project: DayDreamer Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2206.14176v1	Paper: method/results; reported evidence, not our measurement.
W	danijar.com/project/daydreamer	Project: system/videos; selected examples do not establish reliability.
R	github.com/danijar/daydreamer	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: distinguish evolving training from frozen-policy evaluation; design repeated-run accounting before a reliability claim.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

P/W/R identify linked public sources above. NE: not examined in this brief example, not evidence of failure. Support/context labels are provisional, not grades.
