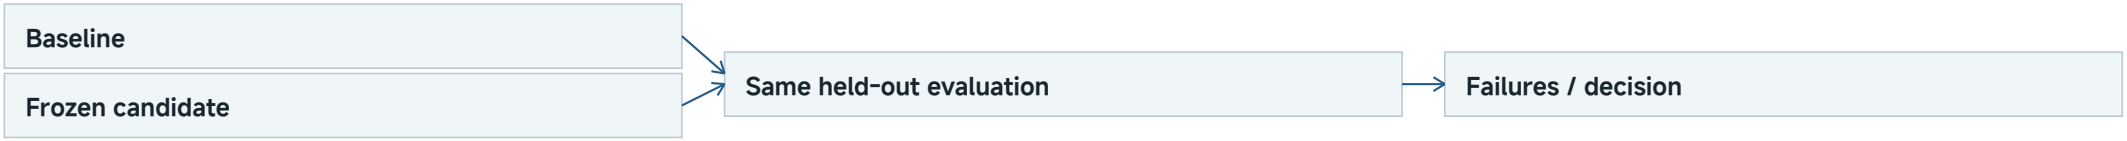
05 / Learning

How is experience used, and what contribution is supported?

EX05 / LEAP Hand | Source analysis | C1 | P: paper; W: project; R: repository



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

VideoDex pretrains from human videos and adapts with mapped Allegro demonstrations; policy execution is inference. This is distinct from LEAP's separate PPO simulation example. [P VI-C,D]

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Separate video pretraining, mapped demonstration training and test objects. Exact episode/split IDs remain NE; do not call mapped data independent LEAP collection. [P VI-C]

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

Analyze Table VI Pick: test success 0.84 LEAP versus 0.75 Allegro. The hand/data-mapping combination changes; this is not an algorithm-only ablation.

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Support one reported learned-picking workflow. Analyst next extracts test counts and split details; lack of a denominator limits precision, not proof that the reported task failed.

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: Do not use Allegro hardware comparisons or simulated rotation velocity as evidence for this Pick learning claim.

Worksheet 5 / Learning - evidence and team review

EX05 / LEAP Hand | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX05 Project: LEAP Hand Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2309.06440v1	Paper: method/results; reported evidence, not our measurement.
W	v1.leaphand.com	Project: system/videos; selected examples do not establish reliability.
R	github.com/leap-hand/LEAP_Hand_API	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: distinguish VideoDex from teleoperation and PPO; record the mapping and test-object boundaries.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
