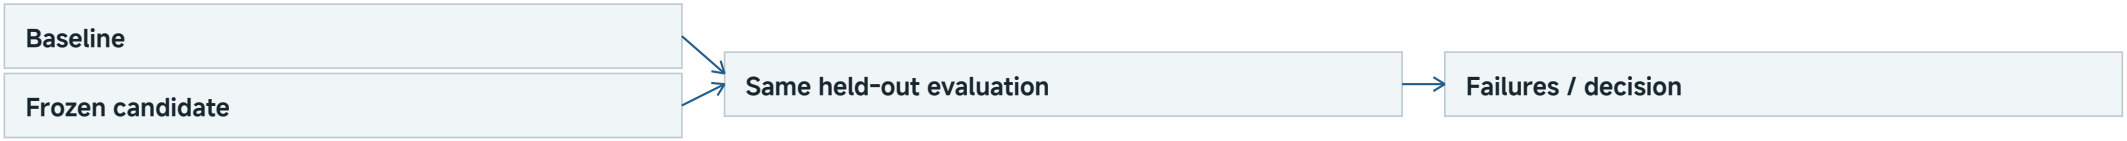
05 / Learning

How is experience used, and what contribution is supported?

EX07 / Walk These Ways | Source analysis | C1 | P: paper; W: project; R: repository



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

PPO learns from simulated transitions; gait selection changes commands within a fixed policy. It does not retrain weights or automatically select behavior. [P Method; Conclusion]

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

Keep training randomization, simulated platform testing and physical demonstrations separate. Compare the same command/terrain setup; seed count is not a hardware trial count. [P Tables 3,5]

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

Table 3 trot survival exceeds gait-free in simulation, while Table 4 shows flat-ground tracking can favor gait-free. Preserve the trade-off rather than claim universal improvement.

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Retain tunable behavior and the scoped simulated contrast. Hardware reliability requires a separate equal-attempt protocol with fixed terrain, commands, intervention and fall accounting.

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Example response: A gait may improve platform survival but reduce flat-ground tracking; preserve the task-dependent trade-off.

Worksheet 5 / Learning - evidence and team review

EX07 / Walk These Ways | SOURCE ANALYSIS EXAMPLE | Original review-page layout

Example ID: EX07 Project: Walk These Ways Claim ID: C1 Revision: draft 2

Mode: Source analysis Pages: canvas + this review; Decision also includes both A3 sides

Evidence scope: selected paper text/tables checked 20 Oct 2026; no raw dataset download or independent experiment.

Evidence ID	Artifact/source + location (clickable)	What it supports; limitation / access gap
P	arxiv.org/html/2212.03238v1	Paper: method/results; reported evidence, not our measurement.
W	gmargo11.github.io/walk-these-ways	Project: system/videos; selected examples do not establish reliability.
R	github.com/Improbable-AI/walk-these-ways	Repository: linked route; code, raw data and current commit not audited.

Next action / owner / verification:

Analyst: compare Table 3 with Table 4 trade-off; freeze gait settings before a new hardware comparison.

Teaching example: no actual student team or signatures. Source analysis is not a reproduced result; blank signature fields are intentional.
