06 / Decision – full 1-3-9-27 screen

What bounded conclusion or next action does the evidence justify?

Team ID: Team___ Project: _____ Claim: _____ Configuration: _____ Date: _____

Mode / claim or next action: _____ Source/configuration freeze: _____ Scope: _____

Generate grounded experience

G1 / Grounded physical problem

G1.1 Mechanism: Is the claimed mechanism explicit, physically credible and open to challenge?

G1.2 Closed loop: Are the implemented body, observations, controller, actions, environment and human roles identified?

G1.3 Task boundary: Are task conditions, episode boundaries, outcomes and exclusions stated?

G2 / Measurable embodiment

G2.1 Embodiment: Is the embodiment or physical coupling realized and identified at the claimed stage?

G2.2 Observability: Are measurements and references suitable for the claimed outcomes, with relevant validity limits?

G2.3 Interfaces: Are consequential interfaces, action meanings, units and timing described or verified?

G3 / Controlled physical evidence

G3.1 Commissioning: What limits, resets, interventions, fault handling and recovery are described or tested?

G3.2 Experience record: What observations, actions, outcomes and contextual records are available or described?

G3.3 Grounding gap: How are model, measurement or interpretation connected to physical evidence under comparable conditions?

Use experience for claims

U1 / Bounded claim logic

U1.1 Claim: Can the available evidence support or challenge the specific claim, without expanding its scope?

U1.2 Role of experience: Is the role of experience in learning, inference, adaptation, evaluation or design insight explicit?

U1.3 Comparators: Are comparators or alternative explanations appropriate to the contribution being claimed?

U2 / Representative experience

U2.1 Correspondence: Are data, model, policy, embodiment and evaluation configurations linked where needed?

U2.2 Coverage: Are coverage, sampling, failures, evaluation partitions and leakage addressed for the claim?

U2.3 Governance: What provenance, rights, human participation and data safeguards are reported where relevant?

U3 / Reproducibility and challenge

U3.1 Reconstruction: What is available to reconstruct the system and evaluation, and what remains unverified?

U3.2 Evaluation: Are protocol, denominators, repetitions, uncertainty and exclusions reported appropriately?

U3.3 Failure analysis: Are failure modes, interventions, competing explanations and negative results examined?

Manage evidence through lifecycle

M1 / Evidence traceability

M1.1 Identification: Are claims, configurations, datasets and experiments distinguishable and source-linked?

M1.2 Change control: Are variants, updates or corrections traceable, and is their effect on conclusions assessed?

M1.3 Counterevidence: Are material failures, null findings, ambiguous outcomes and counterevidence retained?

M2 / Resources, burdens and benefits

M2.1 Resources: Are relevant hardware, compute, time, skills and maintenance resources stated?

M2.2 Data burden: Are collection, annotation, reset, storage and human effort addressed where consequential?

M2.3 Benefit: Is the claimed benefit justified against costs and relevant alternatives within the study?

M3 / Continuing operation

M3.1 Monitoring: What detects mismatch, degradation, invalid measurements or faults in the claimed setting?

M3.2 Operations: What human authority, maintenance, recovery and update practices are described for this stage?

M3.3 Sustainment: What duration, units, contexts or repeated-use evidence supports the claimed persistence?

Support (strength for the bounded question)

0 contradicted; 1 weak; 2 partial; 3 adequate within scope; 4 convergent. NR not reported in inspected scope; NE not examined; NA not applicable with a reason.

Evidence context (separate from origin, support and access)

E1 reasoning/design/plan; E2 executed analysis/simulation/digital artifact; E3 physical/integrated experiments, including externally reported results; E4 specified physical coverage/auditability; E5 independent reproduction/sustained operation within scope. Not a universal quality ladder. NR/NE/NA: context normally a dash.

06 / Decision – evidence and action record

Cite source evidence; state findings and limits. Apply action gates only to project development.

Team ID: Team___ Project: _____ Claim: _____ Configuration: _____ Date: _____

Mode / claim or next action / source scope: _____

G1 / Grounded physical problem

Check	Evidence ID + basis	Support	Context
G1.1			
G1.2			
G1.3			

State: _____ Gap/NA rationale: _____
Action / owner / verification: _____

G2 / Measurable embodiment

Check	Evidence ID + basis	Support	Context

Action / owner / verification: _____

M2 / Resources, burdens and benefits

Check	Evidence ID + basis	Support	Context
M2.1			
M2.2			
M2.3			

State: _____ Gap/NA rationale: _____
Action / owner / verification: _____

M3 / Continuing operation

Check	Evidence ID + basis	Support	Context
M3.1			
M3.2			
M3.3			

State: _____ Gap/NA rationale: _____
Action / owner / verification: _____

Choose the conclusion for the declared mode

Source analysis: summarize supported contributions, partial support, contradictions and unresolved questions by claim family. Distinguish claim-critical checks from extension inquiries. Reporting gaps do not automatically invalidate the contribution. No whole-paper average or readiness award.

Project development only: identify critical checks and requirements for the next action. Green: adequate support, no blocking unknown. Amber: manageable condition. Red: essential condition absent or contradicted. NR/NE cannot satisfy a dependent critical requirement.

Bounded conclusion / unsupported uses: _____

Follow-up inquiry or conditions / owner / verification: _____

Reassessment trigger / invalidated evidence / version: _____

Retain all 27 checks, evidence bases and limitations. Do not turn missing reporting into contradiction or a favorable mean into approval.

Worksheet 6 / Decision - evidence and team review

Class 17 | Due 25 November 2026 before 11:50 Abu Dhabi (UTC+4) | Include every canvas and review page

Team ID: Team___ Project title: _____ Claim ID: _____ Revision: _____

Date: _____ Mode: Project development (label source analysis separately) Pages / IDs: _____

Configuration / evidence version (an earlier commit or artifact ID): _____

Evidence ID	Repo-relative path + evidence ID	Origin; what it supports; limitation / access gap

Missing evidence or next action / owner / verification:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

Replace NN with your team number (01-08). Push submissions/class17/TeamNN-Class17-Decision.pdf to remote main by the deadline. TA retains that version; no physical hand-in. Include all pages and identified continuations.
