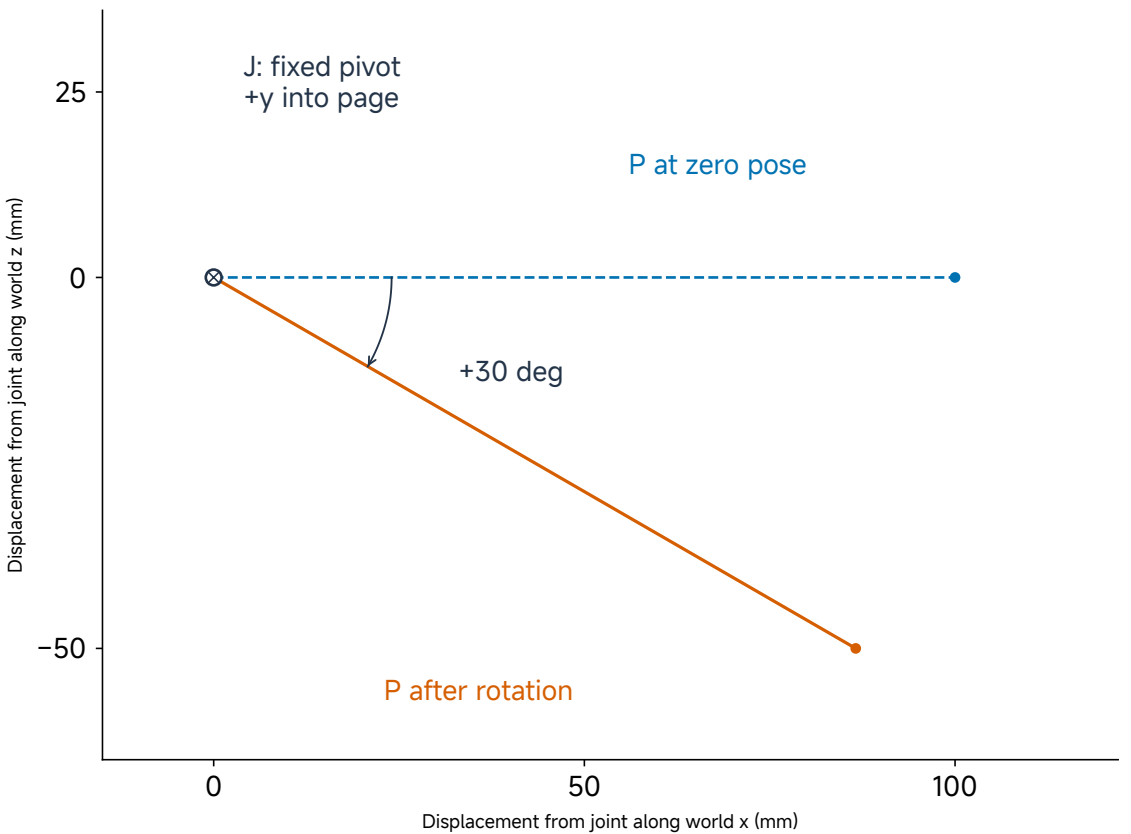
Same payload point, two joint poses



Read the model

Pin_1 origin in Link:

P = (0.100, 0, 0) m

This local coordinate stays fixed.

Convert units once

100 mm = 0.100 m

30 deg = 0.5236 rad

Mesh scale 0.001 applies to vertices.

Check the world position

q = 0: (-110, -3.5, 370) mm

q = 30: (-123.4, -3.5, 320) mm

B2 model coordinates; x-z projection. The -7 mm axial offset from J to P is out of this view.
