01 / Claim

What capability are we testing, under which conditions?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

Our [system] will [perform a capability] in [conditions], evaluated using [measure and criterion] against [comparison].

1. System and capability

Identify the claim and its physical mechanism; distinguish the authors claim from your proposed claim.

2. Conditions and boundary

State task, system version, conditions and exclusions. Identify source analysis or project development.

3. Measure and comparison

Give the measure, units, trial unit and comparator. Distinguish reported outcome from proposed criterion.

4. Purpose and next test

What contribution is supported? What missing comparison or next test would strengthen the claim?

Review: Could your system work as shown while your claim is still false? Write one such outcome.

Worksheet 1 / Claim – evidence and team review

Class 12 | Due 13 November 2026 before 10:50 | Attach to this worksheet's canvas pages

Team / project: _____ Claim ID: _____ Worksheet revision: _____

Date: _____ Mode: Project development / Source analysis Attached pages / IDs: _____

Configuration / evidence freeze / repository commit: _____

Evidence ID	Artifact/source + location	What it supports; limitation / access gap

Next action / owner / verification or revision reason:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

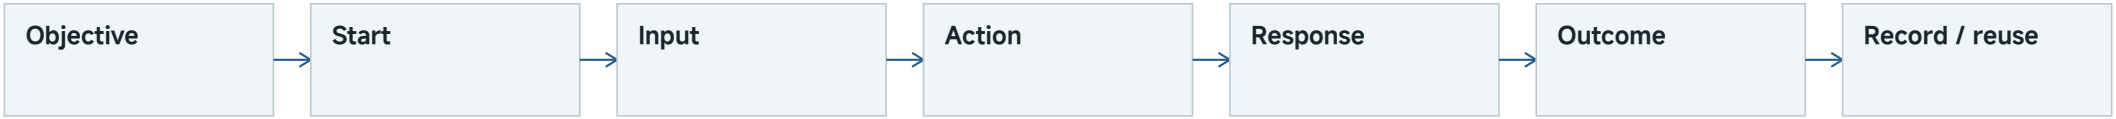

Signature: _____ Date: _____

Additional members or evidence: attach an identified handwritten continuation, list it above and initial its pages. Retain the original and a scan in the private team repository; keep later revisions separate.

02 / Experience

What happens during one interaction, and what can we learn from it?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

1. Objective and start

Reference the claim and source. Distinguish a reconstructed reported episode, an observed episode and a plan.

2. Input and action

Identify observations, commands and physical interaction. Mark unavailable timing or execution detail.

3. Response and outcome

Describe reported response, outcomes, failures and intervention. A schematic is not a new recorded trial.

4. Record and reuse

What record informs learning, inference or evaluation? State its source and the limits of reuse.

Review: What could make the recorded outcome misleading? Mark missing measurements or an alternative explanation.

Worksheet 2 / Experience - evidence and team review

Class 13 | Due 17 November 2026 before 10:20 | Attach to this worksheet's canvas pages

Team / project: _____ Claim ID: _____ Worksheet revision: _____

Date: _____ Mode: Project development / Source analysis Attached pages / IDs: _____

Configuration / evidence freeze / repository commit: _____

Evidence ID	Artifact/source + location	What it supports; limitation / access gap

Next action / owner / verification or revision reason:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

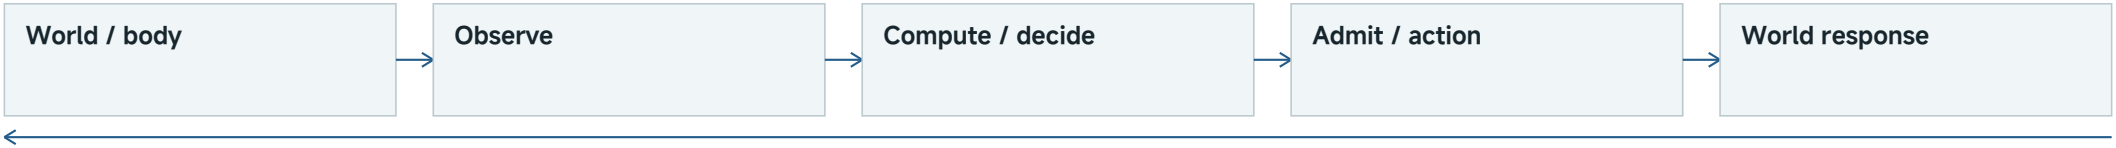

Signature: _____ Date: _____

Additional members or evidence: attach an identified handwritten continuation, list it above and initial its pages. Retain the original and a scan in the private team repository; keep later revisions separate.

03 / System

What system produces that interaction?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Identify embodiment, environment, sensing and frames; separate implemented facts from missing details.

2. Decision and action

Describe implemented controller, action meaning, compute and rates. Do not infer undocumented settings.

3. Authority and record

Identify human roles, limits, logging and reset/recovery where reported; record source or configuration IDs.

4. Critical interface evidence

What interface evidence is reported or tested? Separate available evidence from a proposed acceptance test.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?

Worksheet 3 / System – evidence and team review

Class 14 | Due 18 November 2026 before 11:50 | Attach to this worksheet's canvas pages

Team / project: _____ Claim ID: _____ Worksheet revision: _____

Date: _____ Mode: Project development / Source analysis Attached pages / IDs: _____

Configuration / evidence freeze / repository commit: _____

Evidence ID	Artifact/source + location	What it supports; limitation / access gap

Next action / owner / verification or revision reason:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

Additional members or evidence: attach an identified handwritten continuation, list it above and initial its pages. Retain the original and a scan in the private team repository; keep later revisions separate.

04 / Grounding

What connects the representation or interpretation to physical evidence?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

Representation / interpretation	Physical evidence	Difference / ambiguity	Conclusion / scope limit

1. Comparison boundary

What representation, measurement or task result is compared with which reference? Are conditions matched?

2. Quantities and validity

Identify measures, units, references, tolerances and measurement ceilings; distinguish fact from assumption.

3. Results and uncertainty

Enter reported or measured outcomes with trial counts and uncertainty. Mark data not inspected or not reported.

4. Interpretation and challenge

What does the comparison support? Distinguish observed difference from cause; identify a diagnostic test.

Review: Could sensing error, reset differences or selection explain the discrepancy instead of model error?

Worksheet 4 / Grounding - evidence and team review

Class 15 | Due 20 November 2026 before 10:50 | Attach to this worksheet's canvas pages

Team / project: _____ Claim ID: _____ Worksheet revision: _____

Date: _____ Mode: Project development / Source analysis Attached pages / IDs: _____

Configuration / evidence freeze / repository commit: _____

Evidence ID	Artifact/source + location	What it supports; limitation / access gap

Next action / owner / verification or revision reason:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

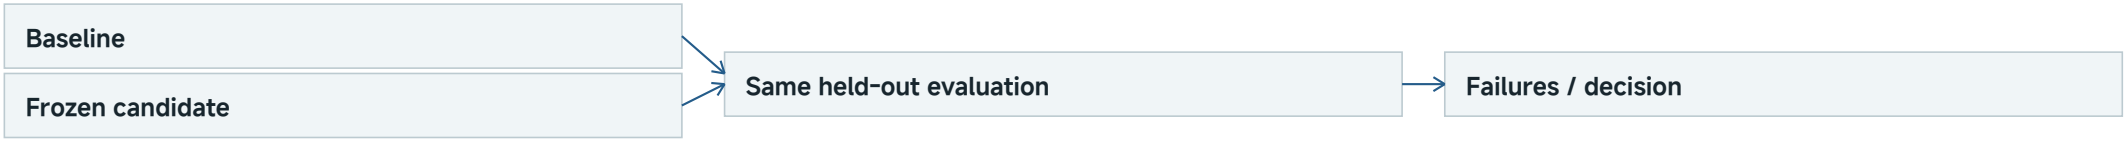

Signature: _____ Date: _____

Additional members or evidence: attach an identified handwritten continuation, list it above and initial its pages. Retain the original and a scan in the private team repository; keep later revisions separate.

05 / Learning

How is experience used, and what contribution is supported?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

1. Role of experience

Identify training, inference/adaptation, evaluation or design insight; not every physical system updates weights.

2. Data and independence

Identify data origins, development/test roles, sampling and leakage checks; do not infer unreported partitions.

3. Comparison and limits

Compare methods under stated conditions; give denominators, failures and ablations with source pointers.

4. Supported contribution

What capability or knowledge is supported? Which alternatives remain? Define a next test or scope restriction.

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?

Worksheet 5 / Learning - evidence and team review

Class 16 | Due 24 November 2026 before 10:20 | Attach to this worksheet's canvas pages

Team / project: _____ Claim ID: _____ Worksheet revision: _____

Date: _____ Mode: Project development / Source analysis Attached pages / IDs: _____

Configuration / evidence freeze / repository commit: _____

Evidence ID	Artifact/source + location	What it supports; limitation / access gap

Next action / owner / verification or revision reason:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____

Signature: _____ Date: _____

3. Name / student ID: _____

Signature: _____ Date: _____

4. Name / student ID: _____

Signature: _____ Date: _____

5. Name / student ID: _____

Signature: _____ Date: _____

6. Name / student ID: _____

Signature: _____ Date: _____

7. Name / student ID: _____

Signature: _____ Date: _____

8. Name / student ID: _____

Signature: _____ Date: _____

Additional members or evidence: attach an identified handwritten continuation, list it above and initial its pages. Retain the original and a scan in the private team repository; keep later revisions separate.

06 / Decision – full 1-3-9-27 screen

What bounded conclusion or next action does the evidence justify?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

Mode / claim or next action: _____ Source/configuration freeze: _____ Scope: _____

Generate grounded experience

G1 / Grounded physical problem

G1.1 Mechanism: Is the claimed mechanism explicit, physically credible and open to challenge?

G1.2 Closed loop: Are the implemented body, observations, controller, actions, environment and human roles identified?

G1.3 Task boundary: Are task conditions, episode boundaries, outcomes and exclusions stated?

G2 / Measurable embodiment

G2.1 Embodiment: Is the embodiment or physical coupling realized and identified at the claimed stage?

G2.2 Observability: Are measurements and references suitable for the claimed outcomes, with relevant validity limits?

G2.3 Interfaces: Are consequential interfaces, action meanings, units and timing described or verified?

G3 / Controlled physical evidence

G3.1 Commissioning: What limits, resets, interventions, fault handling and recovery are described or tested?

G3.2 Experience record: What observations, actions, outcomes and contextual records are available or described?

G3.3 Grounding gap: How are model, measurement or interpretation connected to physical evidence under comparable conditions?

Use experience for claims

U1 / Bounded claim logic

U1.1 Claim: Can the available evidence support or challenge the specific claim, without expanding its scope?

U1.2 Role of experience: Is the role of experience in learning, inference, adaptation, evaluation or design insight explicit?

U1.3 Comparators: Are comparators or alternative explanations appropriate to the contribution being claimed?

U2 / Representative experience

U2.1 Correspondence: Are data, model, policy, embodiment and evaluation configurations linked where needed?

U2.2 Coverage: Are coverage, sampling, failures, evaluation partitions and leakage addressed for the claim?

U2.3 Governance: What provenance, rights, human participation and data safeguards are reported where relevant?

U3 / Reproducibility and challenge

U3.1 Reconstruction: What is available to reconstruct the system and evaluation, and what remains unverified?

U3.2 Evaluation: Are protocol, denominators, repetitions, uncertainty and exclusions reported appropriately?

U3.3 Failure analysis: Are failure modes, interventions, competing explanations and negative results examined?

Manage evidence through lifecycle

M1 / Evidence traceability

M1.1 Identification: Are claims, configurations, datasets and experiments distinguishable and source-linked?

M1.2 Change control: Are variants, updates or corrections traceable, and is their effect on conclusions assessed?

M1.3 Counterevidence: Are material failures, null findings, ambiguous outcomes and counterevidence retained?

M2 / Resources, burdens and benefits

M2.1 Resources: Are relevant hardware, compute, time, skills and maintenance resources stated?

M2.2 Data burden: Are collection, annotation, reset, storage and human effort addressed where consequential?

M2.3 Benefit: Is the claimed benefit justified against costs and relevant alternatives within the study?

M3 / Continuing operation

M3.1 Monitoring: What detects mismatch, degradation, invalid measurements or faults in the claimed setting?

M3.2 Operations: What human authority, maintenance, recovery and update practices are described for this stage?

M3.3 Sustainment: What duration, units, contexts or repeated-use evidence supports the claimed persistence?

Support (strength for the bounded question)

0 contradicted; 1 weak; 2 partial; 3 adequate within scope; 4 convergent. NR not reported in inspected scope; NE not examined; NA not applicable with a reason.

Evidence context (separate from origin, support and access)

E1 reasoning/design/plan; E2 executed analysis/simulation/digital artifact; E3 physical/integrated experiments, including externally reported results; E4 specified physical coverage/auditability; E5 independent reproduction/sustained operation within scope. Not a universal quality ladder. NR/NE/NA: context normally a dash.

06 / Decision – evidence and action record

Cite source evidence; state findings and limits. Apply action gates only to project development.

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____

Mode / claim or next action / source scope: _____

G1 / Grounded physical problem

Check	Evidence ID + basis	Support	Context
G1.1			
G1.2			
G1.3			

State: _____ Gap/NA rationale: _____
Action / owner / verification: _____

G2 / Measurable embodiment

Check	Evidence ID + basis	Support	Context
G2.1			
G2.2			
G2.3

M3.1			
M3.2			
M3.3			

State: _____ Gap/NA rationale: _____
Action / owner / verification: _____

Choose the conclusion for the declared mode

Source analysis: summarize supported contributions, partial support, contradictions and unresolved questions by claim family. Distinguish claim-critical checks from extension inquiries. Reporting gaps do not automatically invalidate the contribution. No whole-paper average or readiness award.

Project development only: identify critical checks and requirements for the next action. Green: adequate support, no blocking unknown. Amber: manageable condition. Red: essential condition absent or contradicted. NR/NE cannot satisfy a dependent critical requirement.

Bounded conclusion / unsupported uses: _____

Follow-up inquiry or conditions / owner / verification: _____

Reassessment trigger / invalidated evidence / version: _____

Retain all 27 checks, evidence bases and limitations. Do not turn missing reporting into contradiction or a favorable mean into approval.

Worksheet 6 / Decision – evidence and team review

Class 17 | Due 25 November 2026 before 11:50 | Attach to this worksheet's canvas pages

Team / project: _____ Claim ID: _____ Worksheet revision: _____

Date: _____ Mode: Project development / Source analysis Attached pages / IDs: _____

Configuration / evidence freeze / repository commit: _____

Evidence ID	Artifact/source + location	What it supports; limitation / access gap

Next action / owner / verification or revision reason:

Each member signs after reviewing the reasoning, evidence labels, limitations and next action. Signatures apply to all identified pages; they do not certify success or readiness. Do not sign for another member.

1. Name / student ID: _____

Signature: _____ Date: _____

2. Name / student ID: _____
