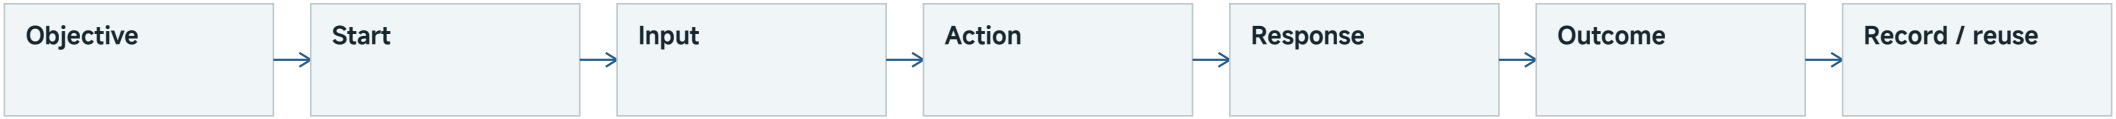
02 / Experience

What interaction data does one episode generate, and how will we use them?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____



1. Objective and start

Link the claim, episode start/reset and end rule. Label this episode planned, team-observed or externally reported.

2. Input and action

Identify observations, timestamps, commands and executed actions where known. Distinguish command from response.

3. Response and outcome

Record response, outcome rule, failures, timeouts and interventions. A selected success does not establish reliability.

4. Record and reuse

List the retained interaction data: observations, actions, responses, outcomes and context. State intended use and missing fields.

Review: What could make the recorded outcome misleading? Mark missing measurements or an alternative explanation.
