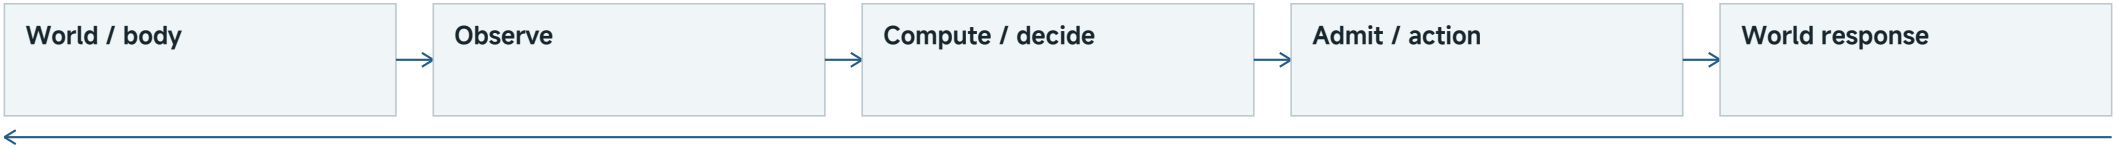
03 / System

What system produces that interaction?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____



Feedback, operator enable/stop/recovery and evidence recording cross the loop.

1. World and observations

Draw embodiment/environment and sensing. Mark frames, measured quantities and implemented versus planned components.

2. Decision and action

Connect observations to computation/control and action. Declare action meaning, units, order, rates and limits.

3. Authority and record

Add operator authority, logging, stop/reset/recovery and configuration ID. Identify evidence kept at each critical interface.

4. Critical interface evidence

Select one consequential interface. State acceptance criterion, test evidence and result, or pending test with owner.

Review: If an interface is late, missing or misordered, how will you detect it and what action is allowed?
