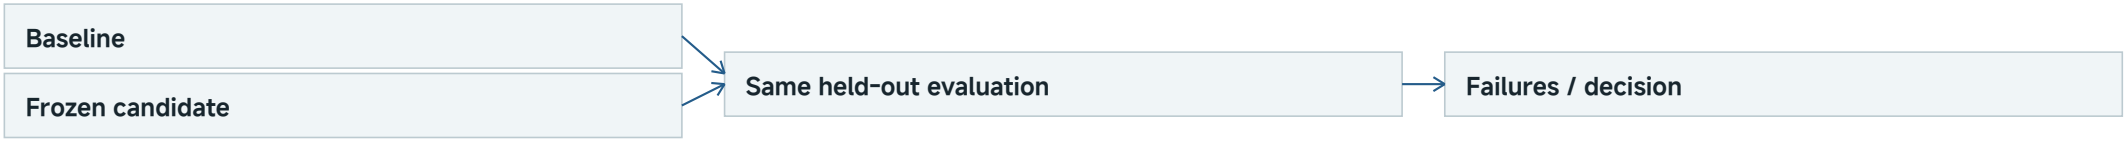
How is experience used, and what contribution is supported?

Mode: Source analysis / Project development Claim: _____ Source/configuration freeze: _____ Date: _____



1. Role of experience

State how interaction data support training, inference, evaluation or design. No new training is required; explain your scope.

2. Data and independence

Identify data origin, selection and development/test groups. Keep related episodes together; disclose tuning or leakage.

3. Comparison and limits

Compare frozen methods or data strategies under matched conditions and budgets. Include denominators and all failure outcomes.

4. Supported contribution

Retain, revise or reject the bounded contribution. No improvement is valid; an unfinished evaluation is not a negative result.

Review: Would the apparent improvement survive the same reset, action limits and trial budget for both methods?
